

# LOBA HygieneGel -

for the health of your employees and customers. Also available with your individual branding!

## Effective against viruses

LOBA HygieneGel meets the recommendation of the WHO for hand disinfection. It is labelled „limited virucidal“ and therefore effective against enveloped viruses, such as corona and influenza viruses (conformable to DIN EN 14476).

## Gentle and convenient

LOBA HygieneGel is pleasant to apply and has a slightly moisturizing effect. The small bottle (100 ml) is perfect for daily use at work and on the road. The big bottle (500 ml) has a convenient dosing pump and is ideal for use on site, e.g. at the counter, in the workshop, in the office or in sanitary rooms.

## LOBA - made in Germany

As a family-owned manufacturer from Germany, our products have satisfied customers' highest quality requirements in the field of finishing, cleaning and maintenance of wood floors for almost 100 years. LOBA HygieneGel is a precious addition to our range.
