Wakol Underlay systems – fast and safe for all renovation works

Renovation becomes easy

Sometimes it seems impossible to place flooring on old subfloors, especially damp subfloors, or just after considerable renovation. Wakol Underlay systems are approved* by the German Institute of Building Technology (DIBt). Together with Wakol Adhesives, they provide extensive and simple solutions. What seems complicated becomes simple, and also fast.

WAKOL TS 102 Footfall Soundproofing Mat, 2 mm / WAKOL TS 103 Footfall Soundproofing Mat, 3 mm

- Footfall soundproofing and heat-insulating mat for old and new buildings
- For textile and elastic flooring and for all tongue and groove engineered flooring types
- Excellent footfall soundproofing
- Tried-and-tested system
- EMICODE EC1

WAKOL EM 140 Decoupling fleece

- For decoupling insufficiently firm subfloors
- For tension-reduced reinforcement under parquet flooring
- Directly coverable with levelling compounds
- Low structure height, low surface weight
- Extremely economical
- System component for 1-day rapid laying
- Very low in emissions, EMICODE EC1 PLUS

WAKOL UM 110 Blocking Mat

- For blocking excessive moisture in cement and in calcium sulphate screeds
- For new installation on dirty old subfloors
- For the fully decoupled installation of textile floorings and PVC/CV-floorings
- Vapour-proof, ultra-firm, directly coverable/bondable

WAKOL RP 104 Decoupling sheet, 4 mm / WAKOL RP 109 Decoupling sheet, 9 mm / WAKOL RP 115 Decoupling sheet, 15 mm

- For decoupling insufficiently firm subfloors
- For rapid height levelling
- Extremely low surface weight
- Covers cracks, footfall soundproofing, directly coverable
- System component for 1-day rapid installation
- Very low in emissions, EMICODE EC1 PLUS

A compact range – many applications

With Wakol Underlay mats, you are well equipped for all renovation work. The concentrated range saves storage costs. The simple use will certainly ensure your and your workers' success.
